## AND INDEX

The books listed may be used in a mathematics program. The list may also be used as an index to this book. Those in bold type are treated in detail. As in the text, the age range for each book is indicated by **L** (lower primary), **M** (middle primary), **U** (upper primary) and **PP** (post primary). Dates of publication are those of the editions which we used in compiling the list. Where possible, we have listed paperback editions.

Key to levels: L = lower primary, 5 to 7 years of age; M = middle primary, about 7 to 9; U = upper primary, 9 to 12.
